Gurimur® IMPACT

The ultimately strong wallcovering for longlasting attractive walls

For walls which are exposed to extreme strains like e.g. in corridors of hotels, hospitals and homes for the elderly, Gurimur has developped a wallcovering which meets exactly these requirements: Gurimur® Impact and Gurimur® Impact Tedlar®. The polyester reinforcement makes the wallcovering extremly scuff resistant – with Gurimur® Impact the walls resist longer to the daily strains caused by carts and beds. Moreover Gurimur® Impact is completely washable and the Tedlar® version also resists practically all chemical influences and solvents. Gurimur® Impact is therefore the ideal wallcovering for walls where maximum resistance is needed.

Technical specifications

Top material:	Extra strong and elastic vinyl film (Impact Tedlar® with Tedlar®-PVF protective film)
Backing material:	Pure cotton fabric, good moisture resistance
Lightfastness:	High, wool scale 7 (DIN 53388).
Cleaning:	Fully washable, also with brush and soap. A clean, wet tissue is often sufficient.
Disinfection:	Easy to disinfect. (Impact Tedlar® resists pracitcally all chemical agents, even solvents)
Inflammability:	Flame-retardant
Tearing strength:	Lengthwise: > 2300 N / 5 cm – across: > 2300 N / 5 cm.
Weight:	Approx. 830 g/m2 (Impact Tedlar® approx. 840 g/m2).
Extensibility:	High, hides wall fissures
Redecoration:	Dry stripping
Applications:	See our hanging instructions, easy to install, no skin irritation
Dimensions:	Width: 130 cm / Length: 25 m or cut length
